Position paper: Australia

Disarmament and International Security Committee (DISEC) - Lisbon Atlantic MUN

Topic A: Lethal autonomous weapons systems. The delegation of Australia recognises the urgency of this question and the work the committee has already done on it. Australia supports a measured approach grounded in international law, and will work with every delegation that shares that aim.

Topic B: Preventing an arms race in outer space. Australia believes regional organisations must lead, with the United Nations providing coordination, funding and independent monitoring. The delegation will propose clear reporting duties and a review after two years.

Australia looks forward to constructive debate and to a resolution that the whole committee can support.
